SUNNYSIDE GREENHOUSES

LINDEN AVENUE

OTTAWA, SEPTEMBER 1ST, 1901.

In presenting our **SIXTH ANNUAL BULB CATALOGUE** we take the opportunity of thanking our many customers for past favors. Our Bulb Trade last season was a large one and we are confident that the interest in Bulb Culture is steadily increasing and deservedly so. We have therefore imported still larger quantities this season of the very **Highest Grades** procurable. The same grades as we plant ourselves in our own business—and we have put the prices as low as warrantable for **first quality stock**. We therefore confidently solicit an increase of trade and would ask growers who have not dealt with us to give us a trial order.

We prepay Carriage charges on all Bulbs catalogued at dozen rates and under. Plants and other articles expressed at Customers' charges except where noted.

Dealers, Florists and Growers of large quantities will please write us for Special Prices.
Seed Catalogue issued 15th January.

A FEW SIMPLE HINTS

—ON—

BULB CULTIVATION.

Flowering Bulbs are the easiest cared for of all flowers and are **absolutely sure to bloom**. This statement is true regarding Bulbs generally. Florists seldom if ever fail in flowering all sorts of bulbs to perfection. Oh! but the amateur will say—because they are grown in greenhouses—that is the reason Florists succeed so admirably. Greenhouses have nothing to do with the main point. Bulbs can be grown perfectly in any private house where the air is not entirely vitiated with superfluous heat and coal gas.

The bulbs enumerated in this catalogue (particularly the Dutch and French) may—for the purposes of the amateur—be divided into three classes, viz.:—1. **Those best adapted for house culture.** 2. **Those best adapted for the garden,** and 3. A combination class—**Those adapted for either the former modes.** The first named class may again be divided into early and late blooming bulbs. The former being available at or before Christmas. And the latter from the middle of January until April or May. For Christmas blooming, only Early Roman Hyacinths, Paper White Narcissus and Chinese Sacred Lily should be planted. For general house culture the foregoing, together with the various Hyacinths, Polyanthus Narcissus and Daffodils, may be successfully grown. While large numbers of Tulips are grown by florists for winter flowers, the average amateur will find them difficult to manage.

For house culture pans are more effective than pots. A 5 inch pan holding one Dutch Hyacinth. A 6 inch pan holding five Roman or Miniature Dutch Hyacinths and for Narcissus larger pans should be used.

When planting use any **light**, moderately rich soil (avoiding all manure that is not thoroughly decomposed). We can supply a Special Compost at 25c. per bushel. Fill the pots or pans loosely almost to the top, press the bulbs into the soil so that only about one quarter will show above the surface, strike the pot sharply to settle the soil, water thoroughly and place away in a **cool dark situation**. The ideal situation is outside (their native soil) covered with sufficient leaves or other material to prevent severe freezing. But as in winter they are somewhat difficult to get at if treated thus, the next best place is a **cool cellar**. The bulbs being **covered with three or four inches of leaves, sawdust or sand to exclude the air** and retain moisture.

Examine them occasionally to see that they do not become dry and keep them there for **two or three months** (the latter the better) before bringing them into the light. As the leaves and flowers develop do not stint the water. Keep them cool even then, and they will help to cheer the winter's gloom wonderfully. Freesias and Easter Lilies do not require to be started in the dark.

HYACINTHS GROWN IN GLASSES.

For glass culture the **Highest Grade** bulbs only should be used. Clean out your glasses thoroughly. If easily procured put in each glass a small nodule of charcoal (we will not attempt to explain why this should be done). Do not worry about the charcoal, however, for the bulbs will grow without it. Fill the glasses nearly full with soft water and place the bulb **so that its base nearly touches the water**. The glasses may then be placed in a box in a cool, dark cellar and covered with leaves as before mentioned. Look at them now and again and replenish the water if it is offensive, keeping it up to the same level, but **not in direct contact with the bulbs** or the latter may rot. Leave your glasses in this position for two months or more, bringing them into the light to flower as they are wanted.

BULBS GROWN OUTSIDE.

Hyacinths, Tulips of all kinds, Crocus, and many varieties of Daffodils, are perfectly hardy out-doors. For outside culture (the Tulip being pre-eminently the most popular), plant thickly and deeply—six inches apart and six inches deep—except Crocus and other small bulbs, which should be planted at less depth—early as possible in October. Cover with a few inches of litter the end of November. Remove same first thing in spring and nature will do the rest.

THE PRACTICAL GARDEN BOOK.

Recommended by the Ottawa Horticultural Society.

Containing simple directions for growing everything about the House or Garden.

PRICE \$1.00.

Milton , splendid flower, red.....	20c
Miss Nightingale , pure white, large truss.....	25c
Boquet Orange , good flower, orange.....	15c

Early Roman Hyacinths

The earliest of all Hyacinths. This season we have discarded all colors except the White, having found all other Hyacinths of this class—Pink, Blue, Yellow and Italian Hyacinths unsatisfactory.

Roman Hyacinths should be planted as early as possible; from 3 to 6 bulbs in a pot make a good display.

	Per 100.	Per doz.	Each.
Early White French Romans , 13 to 15 centim. . . .	\$2.50	40c	4c

Roman Hyacinths are the only Hyacinths that will bloom satisfactorily for Christmas.

High Grade Mixed Hyacinths

Suitable for fall planting outside for early spring bloom. These Hyacinths will also be found to be fairly satisfactory for potting.

Miniature, or Pan Hyacinths

Sometimes called Dutch Roman Hyacinths. They are not Roman Hyacinths, however, but the regular Dutch Hyacinth—same as the preceding class except that the bulbs are smaller. They are an exceedingly attractive and useful class of Hyacinths, giving splendid results, when from 6 to 12 bulbs of one variety are planted in a pan.

	Per 100	Per doz.	Each

For Conservatory and House Culture.

SPECIAL NOTICE.—We will PREPAY express charges on order of \$3.00 and upwards, WHEN CASH ACCOMPANIES ORDER, for plants named below when ordered before December 1st, 1901, and when destination is within 200 miles of Ottawa.

Azalea Indica—We offer a fine selection of well shaped specimens of these showy plants. 1st size, \$1.20; large size, \$1.50 each; extra size, \$2.00.

Asparagus Plumosus—One of the finest decorative plants, not only for its elegant and graceful foliage, but for its durability when cut. 25c. each.

Asparagus Sprengeri—A beautiful new variety of graceful drooping habit, especially adapted for a pot plant. 20c. each.

Araucaria Excelsa—(Norfolk Island pine)—Unrivalled in the plant world for symmetry of form, grace and beauty of foliage. 1st size, \$1.00; larger plants, \$2.00; extra size, \$3.00 each.

Begonias—Including Rex in variety, Metallica, Thurstoni, De Lesseps, Incarnata, Vernon, Alba Picta, &c. Small plants, 10c. each; fine plants for table or window decoration, 25c. to 50c. each.

Chrysanthemums—Nice stocky plants of the varieties most suitable for pot culture (season of blooming from middle of October to end of November). 6 and 7 in. pots, 50c. and 75c. each.

Cyperus Alternifolius—(Umbrella plant)—An ornamental grass, graceful and hardy, needs plenty of water. 30c. each; larger size, 50c. each.

Cyclamens—These beautiful plants give a wealth of rich bloom during the winter. 25c. to 50c. each.

Dracaena Indivisa—(Fountain plant)—Fine, hardy and graceful plant for house culture. 25c. to 50c. each.

Dracaena Bruanti—A very handsome and thrifty plant. \$1.00 each.

Ferns—Our stock of house ferns this season is large, varied and in fine condition. We offer only those varieties that are most suitable for house culture, including Adiantum Cuneatum, Adiantum Pubescens, Cyrtomium, Nephrolepis Bostoniensis (Boston Fern), Nephrolepis Exaltata, Nephrolepis Cordata Compacta (Sword Fern), Polystichum Angulare, Pteris Cretica, Aspidiums, etc. Plants, 10c., 15c., 25c. and 50c. each.

Ferns in Pans—These are constantly growing in popularity for table and window decoration. We can supply pans of mixed ferns prettily arranged at 40c., 50c. and 75c. each.

Primulas—There is probably no blooming plant grown that will give so much pleasure for so long a season with so little care and expense as a Primula. Our stock this season, from high grade seed, is very promising. Price 25 cents each.

Primula Obconica—A profuse blooming primrose bearing on long spikes 10 to 15 flowers; white, shading to blue. 25c. each.

Rubber Plants (Ficus Elastica)—One of the finest plants for parlor decoration; its thick leathery leaves enable it to stand excessive heat and dryness, while their imposing size and deep glossy green always present a cheerful and effective appearance. Price, plants 10 to 12 in. high, 50c. each; 15 to 18 in. high, 75c. each; plants 2 to 2½ feet high, \$1.50 each.

Otaheite Orange—A perfect dwarf orange, set with fruit, 40c. each.

Pandanus Utilis (Screw Pine)—Large plants of these are very handsome. Price 50c. each.

Pandanus Veitchii—A finer and variegated form. \$2.00 each.

ASPARAGUS PLUMOSUS.

PALMS

Palms have become an almost indispensable feature in all decorations, whether for apartments, conservatories or window gardening. We have, this season, a larger and better stock than ever before. The varieties we offer are selected as being the best adapted to general cultivation in house or conservatory.

KENTIA FOSTERIANA.

Cycus Revoluta—Sago Palm, of graceful spreading habit, the glossy leaves being very hardy. Price, \$2.00 and \$3.00 each.

Cocos Weddelliana—This beautiful Palm is unquestionably the most graceful in cultivation. It is admirably adapted for centres of jardinières, and for dinner table decoration it cannot be excelled. Price, 50c., 75c. and \$1.00 each.

Kentia Belmoreana—This, and the following, are undoubtedly the most satisfactory and most effective for house culture. They are more capable of standing ill usage than any other class. Price, \$5.00, \$3.50, \$2.00, \$1.25 and 50c. each.

Kentia Fosteriana—A more vigorous grower than the preceding variety, plants the same price averaging about one-quarter larger than it, otherwise the appearance is almost identical. Price, \$5.00, \$3.00, \$2.00, \$1.25, 50c. and 25c. each.

Latania Borbonica—This is the typical Palm, and has, perhaps, in the past been more largely used than any other. Its large deeply-divided fan-shaped leaves are very attractive, while the plant is extremely hardy. Price, \$5.00, \$3.50, \$2.50, \$1.50 and 75c. each.

Phoenix Reclinata—A large growing graceful Palm of easy cultivation, large specimens being especially effective. Price, \$6.50, \$3.00 and \$1.50 each.

Corypha Australis—An excellent palm of robust habit; fan shaped leaves. Price, \$2.00 each.

LATANIA BORBONICA.

JAPANESE OR MIKADO FERN BALLS

PRICE 50c. Each.

DIRECTIONS FOR STARTING—Place ball in water for 15 minutes and then suspend in any desired position; repeat every two days until growth is started, after which sprinkle occasionally as required. The Fern Ball may be allowed to dry up at any time and set away, and started again by watering as before.
